PROFILE

Final-year CSE student at East West University, majoring in Data Science. Built projects in data analytics, AI automation, web development and database systems. Interested in internships and entry-level opportunities that involve practical problem-solving with data and software.

EDUCATION

BSc in Computer Science and Engineering | East West University

November 2022–Present | Major: Data Science | CGPA: 3.50/4.00 | Capstone in progress

TECHNICAL SKILLS

Programming: C, C++, Java, Python, JavaScript

Data and analytics: SQL, MySQL, Power BI, Pandas, NumPy, Matplotlib, Excel

Web and apps: HTML, CSS, FastAPI, WebSockets, Streamlit, SQLite, JWT, PeerJS

Deployment and integrations: Render, Netlify, EmailJS, LLM and text-to-speech APIs

Tools: Git, GitHub, Jupyter Notebook, Microsoft Office

SELECTED PROJECTS

Olist E-Commerce Sales and Customer Analytics | SQL, Python, Power BI

Completed an analytics workflow covering data validation, SQL analysis, Python exploration and a three-page Power BI dashboard. Analyzed 99,441 orders across sales, customers, sellers, delivery and satisfaction; reported R\$13.22M in product revenue from delivered orders.

Bank Loan Default and Credit Risk Analytics | SQL, Python, Power BI

Validated and analyzed 255,347 loan records, using SQL and Python to compare borrower and loan groups. Built a three-page Power BI dashboard showing portfolio trends and an observed default rate of 11.61%. Documented the workflow and findings as descriptive analysis.

DataMate AI | Python, Streamlit, EmailJS

Built an interactive app for extracting, cleaning, analyzing and exporting data from files, webpages and pasted text. Added missing-value handling, duplicate removal, editable tables, undo history and CSV/Excel/JSON exports; integrated EmailJS for contact messages.

FastAPI WebSocket Chatroom | Python, FastAPI, SQLite, JavaScript

Developed a multi-room chat application with JWT authentication, real-time WebSocket messaging and persistent SQLite history. Added public/private rooms, direct messages, typing indicators, read receipts and file sharing.

ADDITIONAL CSE PROJECTS

Number Guessing Game: Browser-based multiplayer game with PeerJS, private rooms, live chat and turn-based logic.

AI YouTube Automation: Connected script generation, voice narration, generated visuals and video processing in a content pipeline.

Airline Management System: Web application for flight schedules, employee records and passenger bookings.

School Management System: Java application for student, teacher and administrative records using object-oriented programming.

Multi-Class Image Classification: Machine learning project involving model training, evaluation and performance improvement.

ACTIVITIES AND LANGUAGES

University robotics team: Helped design, program and test a line-following robot, working on navigation and control challenges with teammates.

Bengali: Native | English: Professional proficiency
